- Turkmen
- Russian
- Turkish

Kurbanov Yusup

Front-end Developer

I have been in IT for more than 2 years, I have been engaged in frontend development of commercial projects for more than 1.5 years. I have been actively developing web applications (React) for the last year.

During all this time, I managed to work independently as a freelancer and worked in a small company.

I have gained experience in freelancing and in a small company, and I have extensive experience working with clients and designers, implementing projects from start to finish.

In 2022, I graduated from the University with a degree in Information Systems and Technologies. He also took additional courses in layout and SPA development.

EXPERIENCE

Front-end developer

10.2021 - 02.2023 / Black-Perimeter

My responsibilities included participating in the development and support of my own CMS system and creating and configuring functionality, as well as participating in the development of web applications for clients based on this system.

The technologies I used:

React / Redux / React-router / SCSS / Git / Github

Web developer

04.2021 - 10.2021 / Freelance

He worked as a freelancer, collaborating with several designers to create websites. The main responsibilities included the development and implementation of websites using HTML, CSS and JavaScript, as well as the refinement and support of sites on the WordPress platform. In the process, he ensured effective interaction with designers and customers in order to achieve the required results on time and according to the project specifications.

The technologies I used:

HTML / CSS / Javascript / WordPress
